

### **Summary**

This book goes a long way towards encouraging girls (and women!) to put their creative powers to practical use. It is gratifying to learn that many everyday items (ice cream cones; Toll House cookies) were invented by women. And the items that are not so 'everyday' (Kevlar; space shields) have such a positive impact on the world around us. The illustrations are wonderfully creative, blending the fascinating details of the text into whimsical collages. (*Amazon.com*)
